

Title page (non-blind) — for the double-blind manuscript

Title. A reviewer-safe public-source observatory for AI edge cases under source, language, and governance uncertainty

Author. Anton Sokolov

Affiliation. Tyche Institute, Tallinn, Estonia

ORCID. 0000-0003-2452-7096

Role. Researcher

Correspondence. anton.sokolov@tyche.institute · Mustamäe tee 167-50, Tallinn 12913, Estonia

System name (revealed here only). The observatory described in the manuscript is named **LI-MEN**.

Public companion atlas. <https://obscure-ai.eatf.eu> — dataset at <https://obscure-ai.eatf.eu/data/cases.json>

Public version of record. <https://doi.org/10.5281/zenodo.20700813> (non-blind preprint v0.2, CC-BY-4.0).

Declarations (*please confirm before submission*)

- **Competing interests:** none declared.
- **Funding:** no external funding for this work.
- **Data availability:** the figure, the per-class evidence panel and the tier-by-theme matrix are available on request and will be released publicly on acceptance; the public companion atlas above carries every case with its tier, claim ceiling, caveat and primary-source link.
- **Scope of claims:** methods/data article. The catalogue makes no claim of corpus completeness, incident prevalence, representativeness, legality-by-inference, or a single fused denominator.

This title page accompanies the blind manuscript preprint-v0.2-anon.pdf, which carries no identifying information (no author, no affiliation, no system name, no companion URL; the figure title is neutralised).
